

# FLOOR SKETCH

Smart Designing Smart Living

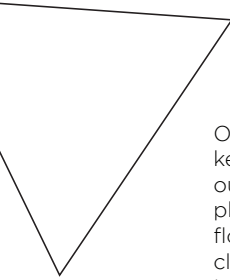

## ▶ ABOUT US

Floor Sketch was established in 2013 by Mr. Rajesh. M with a vision to provide flooring solutions that transforms a space interior & exterior from bland to stunning.

Get floored with Floor Sketch collection of quality wooden flooring. With a variety that can please the most discerning of tastes and can give you the mera wala warmth and comfort that every space deserves. Our Journey began in the year 2013, with a simple thought of transforming spaces and creating luxury in everyday living.

If you think about it, what are the most visible spaces in a home or a commercial space?

It's the floor and the walls. With the mission to create maximum impact while not breaking the bank, we at Floor Sketch bring you functional and durable flooring and wall covering solutions that are beyond just looks.

Our paramount focus is being client centric and keeping up with the trend by regularly updating our extensive product range so that our 1000 plus customers are always happy and get the flooring and finish they desire. When we say client focused, we mean it. No job is too small or too big. Right from doing up a single room of 150 sq.ft. to a 10Lakh sq.ft. area, we do it all.

What's more is that we provide installation services to make the process completely hassle free. So, our clients need not have to worry about how many boxes or rolls to order or about wastage or dealing with independent installers.

With Floor Sketch, the entire process is transparent, professional and easy.
